

Structures conditionnelles

10

La structure **case . . . esac** : (choix multiples)

```
case variable in
```

```
expression_reg1)
```

```
Commande1
```

```
Commande2 ...
```

```
;; #executés s'il y a correspondance entre variable et l'expression_reg
```

```
expression_reg2)
```

```
Commande1
```

```
Commande2 ...
```

```
;;
```

```
*)
```

```
commandes ... #Default, executés dans le cas échéant
```

```
;;
```

```
esac
```
